Notice – Continuing Education Credit Not Allowed

It has come to the attention of the Insurance Council of Manitoba that a presentation by Clara Hughes at the Insurance Brokers Association of Manitoba Convention on April 29, 2016 was assigned 1 continuing education credit by IBAM. Despite discussions between IBAM and ICM in advance of the presentation the ultimate content did not meet the definition of regulatory Continuing Education for a General Insurance Agent licence. Continuing education credit should not have been offered or applied, and credit for this presentation may **not** be used towards your CE mandatory requirement for maintenance of a licence.

For licence holders who entered this credit for renewal of their licence in 2016, please be advised that it will be disallowed retroactively**. For those who obtained only the minimum (8) continuing education credit hours for the 2016 renewal, you will be required to obtain (9) continuing education credit hours prior to renewal of your licence in May 2017**. **This presentation will not be accepted for any carry forward of credit.** You are responsible to review your continuing education hours to determine if this reduction will impact you.

The ICM wishes to remind you that you are individually responsible to ensure that courses taken meet the published definition for General Insurance Continuing Education, even when offered by an accredited course provider. These requirements are posted on the ICM website at www.icm.mb.ca , and you are encouraged to review prior to taking a course for the purpose of satisfying your mandatory CE licensing requirements.

If you have questions or concerns, please contact the Insurance Council of Manitoba at contactus@icm.mb.ca .
