

Important MFA Update Action Required by Stakeholders

Communicated to Industry Jan 15/25

In anticipation of upcoming enhancements to our security measures, we are pleased to announce that we will be adding the option to use your cell phone for multi-factor authentication (MFA), in addition to the existing e-mail address option.

To ensure a smooth transition, we kindly ask all stakeholders to log into their portal and ensure that their personal cell phone number has been added to their profile.

This enhancement aims to provide more flexibility and strengthen the security of our systems.

Thank you for your cooperation.
